

AERO RUNNER TREADMILL

Innovation with **ServoStep**, **GaitTrack Pro** and our intelligent pressure control system takes recovery to new heights. Experience unparalleled stability, safety, and continuous care like never before.

ServoStep

offers the gentlest start at ultra-low speeds (0.1km/h), guiding our clients initial steps with a touch of grace and confidence.

Integrated UPS System

safeguards against data disruption, embodying our commitment every session's progress is preserved, ensuring continuous care for our clients.

GaitTrack Pro

offers unmatched real-time, more precise data tracking to ensure every step is meticulously measured, monitored and printed.
